

## Twisted Tie Block Technique

This block can be done in any size you wish....the template below is meant for a 4 ½ inch base block. When increasing or decreasing the finished size of the base block, you need to increase or decrease the size of the twisted portion a total of ¾ inch...this will become clear when you read the rest of the directions.

To make the twisted or tie portion of the block (made traditionally with two different fabrics, one of which will be used to surround the base fabric and complete the block) do as follows:

- Either use the template below if you are making a 4 ½ inch block (4 inch finished)

- Or make a larger or smaller base finished block by making your own template. Remember, your new twist tie template will require two blocks that are at least ¾ inch larger than your intended base block...make new template as follows:
